PROFILE

Full-Stack Web & Mobile Developer with hands-on freelance experience delivering responsive websites, cross-platform mobile apps, backend APIs, and interactive Unity applications. Comfortable across the stack — from React/Angular front ends to Node.js, PHP, and ASP.NET back ends — with a strong focus on clean UI/UX, performance, and cross-browser reliability.

EXPERIENCE

Full-Stack Web & Mobile Developer

Freelance · July 2023 – December 2025

- Developed responsive websites and web applications using React, Angular, HTML5, CSS3, and JavaScript.
- Built mobile applications with React Native and native Android.
- Developed backend APIs and services using Node.js, PHP, and ASP.NET.
- Designed and managed relational databases with MySQL and SQL.
- Created interactive applications and prototypes using Unity and C#, including 3D assets, scenes, and gameplay systems.
- Designed clean, intuitive user interfaces following UI/UX best practices.
- Optimized application performance and ensured cross-browser compatibility.
- Managed source code and collaborated using Git and GitHub.
- Partnered directly with clients to gather requirements and deliver high-quality software solutions.

PROJECT AREAS

Responsive Web Applications	Mobile Applications	Backend API Development
Unity 3D Applications	Chatbot Solutions	Browser Extensions
